## Professional Profile

Software Engineering graduate with professional experience in web and mobile development. Currently pursuing a Master's Degree in Cybersecurity at UNIR and an Advanced University Program in Industrial Cybersecurity. Interested in building a technical career in cybersecurity, applying my background in programming and software development to the analysis and protection of systems, applications and networks, including industrial and OT environments. Proactive, comfortable working in teams, and committed to continuous learning when facing new technical challenges.

## Education

### International University of La Rioja (UNIR)

Master's Degree in Cybersecurity + Advanced University Program in Industrial Cybersecurity

Online, Spain
